

Bulletin No. - 01 – 22 August 2013

New Meet&Greet Tata Steel IJmuiden

Tata Steel and P&O Ferrymasters have set the objective to: continually improve the safety of the outbound finished steel transport. This has led to the introduction of a central control location (Meet&Greet) at Tata Steel IJmuiden, where, upon arrival and departure, all finished steel truck transports will be checked. Through this information bulletin we would like to inform you about the new Meet&Greet.

With the implementation of the Meet&Greet on the 2nd of September, all checks, including checks on load securing, for finished steel products, will be performed at the Meet&Greet location.

The Meet&Greet is located in the P&O Ferrymasters building, location code 8613. The opening hours of the Meet&Greet are, Monday till Friday from 06:00 to 22:00 hrs. There will be no loading and unloading of trucks outside opening hours of the Meet&Greet.

At the Meet&Greet there will be a distinction between trained and untrained drivers. Trained drivers with a permanent Tata Steel pass can independently print the freight papers at the P&O office. Untrained drivers with a Tata Steel day pass must report at the driver reception desk for instructions and to obtain the freight papers.

On arrival, the truck must park in one of the marked lanes. The driver can then receive the freight papers at the P&O building. After receipt of the freight papers, the driver must report to the Meet&Greet surveyor for a check on their personal protective equipment, the condition of the vehicle and the required materials. Trained drivers will be checked on a spot basis, untrained drivers will always be checked. After checking, the driver will receive a stamp on his CMR. The driver can then report at the warehouse for loading. After loading, the driver will again report to the Meet&Greet location for a check on load securing. After the load securing check, the driver can leave the Tata Steel site.

If you would like more information about the new Meet&Greet please check out website: www.poferrymasters.com/tatasteel or email: safety@pofm.com.
