

Incorrect PPE leads to injury

What Happened:

Driver was accessing the truck catwalk area to uncouple his trailer. He was using 3 points of contact correctly, however as he has grabbed the hand rail his hand has slipped off causing him to fall backwards. The driver was wearing wet and slippy leather gloves.

Actions:

- ✓ Always use correct PPE for the task in hand
- ✓ **Be aware of weather conditions and if the PPE you have is fit for purpose**
- ✓ If any PPE is deemed unfit and worn, then always request replacement
- ✓ Guidance is available at www.poferrymasters.com/carrierinfo .
